PROFILE

Software developer/ Computer Scientist with a strong foundation in software development, data structures, and algorithms. Experienced in working with Administrative programs such as Microsoft Excel, C# and MySQL and adept at developing web and mobile applications. Demonstrates excellent problem-solving skills and a passion for learning emerging technologies like AI and cloud computing. Seeking an opportunity to contribute technical expertise and innovative thinking to dynamic projects in a forward-looking organization.

WORK EXPERIENCE

TPTC Technologies   2022 - 2023
Database Administrator

- Performed administrative tasks, including coordinating daily operations and maintaining accurate client records. Monitored and organized general office requirements, and ensuring seamless functionality and a well-equipped workplace environment.

Mantiteng Guest House   2023
Guest Management System (freelancer)

- Developed and implemented a guest management system for a guest house, streamlining booking processes, enhancing guest experience, and improving operational efficiency through custom-coded solutions

Motion 3d   2024 - Present
Project Manager

- Founded and managed my own startup focused on designing and developing innovative management systems to address operational challenges across various industries. Led end-to-end product development, from conceptualization to deployment, ensuring solutions were tailored to client needs. Oversaw business operations, including project management, client acquisition, and team coordination, while maintaining a commitment to delivering efficient and user-friendly systems

EDUCATION   2017 - 2021

Bachelor of Science Computer Science
University of Limpopo

Udemy C# and Python Certified   2022 - 2023
Udemy Online Learning
